When planning a vacation getaway, there are plenty of practical considerations: your budget, the time of year, number of days. The list of practicalities is endless, but practicalities bore us easily. So, we've devised a travel dossier based on something far more spiritual that will help you find the balance you are seeking in your vacation. Every astrological sign falls within one of the four energies of life — earth, air, water and fire. These elements create the perfect guidepost to helping you find your place in the world.

Explore the following pages to find your ideal, astrologically compatible vacations at our Ocean-approved destinations.
